HOW TO MEASURE

Please reference the charts below when taking your measurements. Measure each area 2-3 times then take the average of each attempt. When measuring please make sure the tape measure is taught against the body. Avoid having the tape measure too loose or too tight when measuring yourself. If you can place a finger between your body and the tape measure it is too loose and the measurements will not be accurate. Make sure to measure across the highest point of the bust and butt when measuring. Please reach out with any additional measurement questions.

Girth is measured over the shoulder, across the highest point of the chest, through the crotch, and threaded up the back to meet the starting point (around the body). The front pant and back pant are measured across while the hip measurement is the full distance around the widest part.

SKATER PHOTO

Please include a full head to toe photo of the skater wearing form fitting clothing (see photo example below for reference). I will use this for color matching and to help create a design that flatters the skater's proportions as well as features. I will also use this to visually reference measurements when creating the custom costume.

I understand that by signing this I am certifying that all of the above information is correct. I am aware that all custom designs are final sale. They are not returnable, refundable, or exchangeable for any reason. Buyers are responsible for any local tax required at the time of purchase or delivery. Any payment made towards the costume including the deposit is final sale and can not be refunded for any reason.
